DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-11 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Smith (GB 2,344,487).

Smith discloses an ultrasonic resonator or horn with slots extending through the resonant body. As shown in Fig. 2, the horn comprises an input face or fixing section 12, an output face or sealing section 14 and a transition section positioned therebetween. This transition section is provided with one or more slots 22 extending between the fixing and sealing sections in the manner claimed by the applicant.

These slots can have various shapes, sizes and configurations with first, second and third radii of curvature and rounded off portions in the manner claimed by the applicant. See Figs. 5-6, 10-12 and 25-28. Also see page 5, lines 23-28; page 6, lines 7-24; and page 8, lines 13-24.
